

REMARKS

Reconsideration and allowance are respectfully requested.

Examiner Kanervo and SPE Kalinowski are thanked for the courtesies extended at the telephone interview conducted on September 9, 2009 along with Hakan Ventura, Oskar Sander, and the undersigned. During the interview, Mr. Sander described the background and problems related to CSDs that the claimed technology addresses and solves. He also discussed the non-limiting examples from Figures 1-3 of the instant application. The final rejection and the applied references (Lea, Althoff, and Indeal) were summarized. Amendments to claim 1 were presented that further distinguish claim 1 from the combination of Lea, Althoff, and Indeal. In addition to the claim features not taught by the combination, it was explained why a person of ordinary skill in the art would not have a reasonable basis to combine Lea, Althoff, and Indeal. Examiners Kanervo and Kalinowski agreed that the proposed claim 1 would overcome the prior art rejection, but that a new search would need to be performed when an RCE was filed with the amended claim set. Accordingly, amended claim 1 and similarly amended claim 8 are presented.

New dependent claims 15 and 18 have been added and find example support in Figure 2 and page 6 of the original specification. New dependent claims 16, 17, 19, and 20 have been added and find example support on page 6, line 21-page 7, line 15 the original specification.

Examiners Kanervo and Kalinowski also advised how to overcome the 35 U.S.C. §101 rejection of claim 8. Those suggestions are adopted in this amendment.

ERIKSSON
Serial No. 10/601,199
December 31, 2009

Accordingly, Applicants believe the application is in condition for allowance.

An early notice to that effect is requested.

Respectfully submitted,

NIXON & VANDERHYE P.C.
